(608) 381-8852 | ttpham6@wisc.edu | [Linkedin](#) | [Website](#) | [Google Scholar](#)

Education

University of Wisconsin-Madison

May 2025

Bachelor of Science, Molecular & Cell Biology, GPA: **3.86/4.0**

Honors & Awards

AAI Travel Grant, American Association of Immunologists	2025
Distinctive Scholastic Achievement, University of Wisconsin-Madison	2025
Summer Internship Scholarship, University of Wisconsin-Madison	2024
College of Letters & Science Scholarship, University of Wisconsin-Madison	2024
Dean's List (6 semesters), University of Wisconsin-Madison	2021-2025

Clinical Experiences

SuperScribe, LLC July 2025 – September 2026

Medical Scribe via Children's Healthcare of Atlanta Orthopedics and Sports Medicine Clinics

- Documented 30+ patients/day, including symptoms, physical exams, and treatment plans.
- Maintained charts current as test results or plans change, responding promptly to physicians' documentation needs.
- Navigated EPIC/clinic documentation while complying with HIPAA in a high-volume clinical setting.
- Trained 10 new clinical scribes within 8 months, teaching clinical/EPIC workflows and orthopedic medical terminology.

Research Experiences

Bement Lab at the University of Wisconsin-Madison

March 2022 – May 2025

Undergraduate Researcher under Professor William Bement

Explored the pathways of wound healing in single cells via *Xenopus Laevis*.

- Created 5 fluorescently tagged constructs to study Arp2/3 activity, optimizing expression levels by 20%.
- Utilized confocal microscopy, FIJI, & MATLAB to collect, analyze, and interpret complex biological imaging data.
- Built automated Python scripts for [statistical test selection](#) and [experimental data QC](#) using Claude Code, reducing hours of manual analysis tasks to a few minutes.
- Presented and communicated my findings at the ASCB Conference and co-authored a paper.

Novartis Institute of Biomedical Research

May 2024 – August 2024

Summer of Science Intern under Dr. Giang Nguyen (<3% acceptance rate)

Designed a workflow to identify and characterize human primary B cells.

- Designed a nanovial technology workflow for efficient capturing and quantifying antibody secretion on a large scale.
- Employed FACS to analyze cell secretion profiles and manage high-detail experimental data.
- Presented and communicated my findings at the AAI Annual Meeting.

Teaching Experiences

Department of Biochemistry at the University of Wisconsin-Madison

January 2024 – May 2025

Teaching Assistant under Professor Mario Pannella

- Led bi-weekly discussion sessions (>10 students) to review difficult concepts and practice exam problems.
- Developed interactive Kahoot and Quizlet practice questions to support active learning and reinforce course material.
- Created review sheets summarizing key concepts and providing more practice problems to prepare for exams.

Supplementary Information

Publications

¹ L. E Hoachlander-Hobby et al., A self-organized signaling hierarchy patterns the cortex during cell repair. (Submitted) (2026). Preprint: <https://doi.org/10.64898/2026.08.21.746176>

² **T. T Pham**. Investigating the Role of Arp2/3 in Cdc42 Signaling During Single Cell Wound Repair. Senior Thesis (2025).

Conference Posters

¹ **T. T Pham et al.** Establishing a nanovial workflow to identify and characterize human primary B cells secreting antigen-specific antibodies. AAI Annual Meeting, Honolulu. May 2025. ([Poster](#))

² **T. T Pham et al.** Investigating the Role of the Arp2/3 Complex in Single Cell Wound Repair. ASCB Annual Meeting, San Diego. December 2024. ([Poster](#))

Skills & Interest

Languages: Vietnamese (native), Spanish (basic).

Wet Lab Skills: Molecular Cloning, Confocal Microscopy, FACS, Flow Cytometry, Primary human B-cell culture.

Software Skills: EPIC, MATLAB, GitHub, FIJI/ImageJ, Microsoft Word/PowerPoint

Hobbies: Soccer, cross-stitch, building LEGO
